User Stories for Onboarding Experience Epic

User Story 1: As a vanilla git power-user that has never seen GiggleGit before, I want to quickly understand the unique features of GiggleGit to leverage its full potential.
User Story 2: As a team lead onboarding an experienced GiggleGit user, I want to ensure that the transition to GiggleGit is smooth and that my team can continue their workflows without interruption.
User Story 3: As a new user, I want to be able to authenticate on a new machine to access my repositories seamlessly.
Task for User Story 3: Implement authentication flow for new devices.
Tickets:

- **Ticket 1:** Title: Design authentication UI
  Details: Create a user-friendly interface that allows users to input their credentials securely.
- **Ticket 2:** Title: Integrate OAuth for authentication
  Details: Implement OAuth authentication to securely connect users' accounts across devices.

What is wrong with this user story?
The user story "As a user, I want to be able to authenticate on a new machine" is not a valid user story because it lacks a clear benefit or outcome. It should say why authentication is important, such as ensuring security or access to files.
